Total care Toothpaste

Using the suitable toothpaste will protect your teeth from plaque, brown spots, and acidic substances.

- Helps remove plaque build-up
- Increasing mouth saliva
- Protection of teeth against bacteria and acidification
- Restoration of tooth enamel
- Anti-tartar
- Helps maintain healthy gums
- Feeling of freshness
- Anti-Inflammatory

Fluoride retained in saliva after use Vi-one toothpaste, although its concentration in saliva is low, its concentration in microbial plaque is high, this process brings calcium and phosphate ions to the tooth to create to new surface area which is acid resistant and stop tooth decay.

With twice daily brushing targets acids and food particles in your mouth. It also contains fluoride to strengthen teeth. People with cavities or at risk of tooth decay should discuss with a dentist.

Fluoride ion (1450ppm)

90 g

Sensitive Toothpaste

Vi-one sensitive toothpaste contain either potassium nitrate, which soothes the nerves and reduces pain signals, or sodium fluoride-

- Reduction of dental pain and sensitivity
- Teeth whitening with low abrasion
- Remineralization of tooth enamel
- Maintaining dental health
- Improve gingivitis
- Prevent tooth decay
- Clinically approved formulation

(1450 ppm F), which builds a protective layer over exposed dentin to block triggers from reaching the nerves. Daily toothpaste with Triple Action: Provides long-lasting protection from sensitivity, helps restore gum health, and re-hardens the enamel surface. Vi-one sensitive toothpaste contains potassium ion, which causes depolarization effect on nerve conduction.

Brush two times every day, for continued sensitivity relief with Vi-one toothpastes. But to optimize its numbing effect, you should use the product regularly or as recommended by the dentist.

Fluoride ion (1450ppm)+KNO₃

90 g

Whitening Toothpaste

Whitening toothpastes are effective for removing surface stains from the teeth, but they can't change the natural tooth color.

- Removes 90% of surface stains on teeth and prevents new stains from forming
- Increase and protect the whiteness of your teeth
- 24-hour prevention of surface stains by brushing twice
- Helping to whiten teeth from the inside and outside
- Suitable for daily use
- Contains fluoride to protect against decay

Whitening toothpaste has three advantages: whitening, strengthening tooth enamel and protection against the return of plaque, and in addition, it has two types of active whitening ingredients that double the whitening power without causing damage, and has a minty taste and freshness breath for a long time.

90 g

Vi-one Herbal combines vi-one oral science with nature's best herbs to help you and your family achieve naturally stronger teeth and healthier gums. vi-one Herbal contains natural extracts such as Ginger, Eucalyptus, Aloe Vera, Chamomile and Mint which aids in cavity prevention and results in longer-lasting fresh breath.

90 g

Extra Fresh Toothpaste

Calcium carbonate provides remineralization and lasting protection, when formulated with sodium monofluorophosphate (SMFP),

- Excellent cleaning performance
- Remineralization teeth
- Desensitization for dental care
- Whitens Teeth
- Preventing and fight bad breath
- Long-lasting freshness

thanks to particles retained in plaque for neutralizing harmful acids. Vi-one toothpaste as a polishing and abrasive agent, it can easily remove dental plaque from the teeth and keep them clean. calcium carbonate helps neutralize acid and raise pH in the mouth. This counters the erosive effect of acids from foods and plaque bacteria. Higher pH promotes enamel remineralization. The calcium in calcium carbonate toothpaste offers a small boost to your daily calcium intake. Calcium is essential for building and maintaining strong enamel.

130 g

Cavity Fighter Toothpaste

Calcium carbonate gently cleans and whitens tooth enamel naturally. It is also said to aid in "remineralizing" or reversing

- o Dental nutrition with a unique formula of calcium carbonate + sodium monofluorophosphate
- o Effective cleansing
- o Remineralization & repair
- o Natural whitening
- o Prevents cavities
- o Freshens Breath

the effects of tooth decay while supporting healthy bones and enamel. Calcium carbonate is soft enough provide cleaning action without scraping away enamel over time. Vi-one toothpaste is a source of calcium and phosphate with a large surface area, ensuring high reactivity and efficient remineralization of the enamel by repairing microscopic defects. As a result, vi-one toothpaste improves tooth whiteness while smoothening the surface of the teeth. The use of calcium carbonate toothpaste is suitable for supplying calcium lost to teeth due to the daily consumption of sweets and snacks and strengthening the natural reabsorption process of calcium from saliva.

CHX-CPC-Zn effective against halitosis with no side effect

330 ml

Regular use of mouthwash has several key benefits. Mouthwash is suitable for removing plaques and bacteria that remain even after brushing and flossing. Mouthwash

containing fluoride has a significant effect on the strength of teeth. Sodium fluoride is absorbed by the surface of hydroxyapatite

General Mouthwash

- Remineralizes teeth to prevent decay
- Protects teeth against plaque & tartar
- Freshens breath
- Gum protection
- Remove and prevent tough stains
- Forms a protective shield to help prevent future stains
- Prevents cavities

crystals on the teeth, which are necessary for mineralization. This renders the teeth more resistant to demineralization by changing the apatite crystal solubility. The demineralization process of teeth is controlled by sodium fluoride. Vi-one mouthwash contains 0.05% sodium fluoride, which provides the amount of fluoride ions needed for teeth to reduce and eliminate surface caries with daily consumption.

Mouthwash is a simple but effective way to clean and whiten teeth. The use of Vi-one complete mouthwash containing fluoride helps the health of the mouth and teeth through the remineralization of enamel and the repair of primary tooth decay. Vi-one Complete Mouthwash contains Cetylpyridinium Chloride

General Mouthwash

- 12hr germ protection
- Strengthens teeth
- Cavity protection
- Multi-Protection
- Kills germs causing bad breath
- Helps prevent tartar
- Restores enamel

(CPC), a tetraammonium compound that has an antibacterial effect on oral organisms, *Helicobacter pylori*, and yeasts in dental plaques, which leads to control of plaque and gingivitis. The simultaneous use of toothpaste and mouthwash containing fluoride ions and CPC Vi-One destroys maximum Gram-positive and negative bacteria and causes teeth whitening and maintaining oral and dental hygiene.

Regular and daily use of vi-one junior mouthwash helps to protect and strengthen children's primary and permanent teeth. Vi-one junior mouthwash is designed for children, which contains 230 ppm of fluoride ions, cetylpyridinium chloride and disodium phosphate, which helps the health of teeth and

Junior Mouthwashes

- Prevent dental caries
- Flavor designed for kids
- Strengthens enamel
- Restores minerals to soft spots
- Fluoride protections
- Kills germs causing bad breath

and gums, and even parts of the teeth that cannot be reached with a toothbrush and dental floss, and a powerful protection for Children's teeth. The superiority of vi-one mouthwash is the use of sugar-free and harmless sweeteners, which are processed to attract children's interest with strawberry and bubblegum flavors. Also, this product does not contain alcohol and dyes, which does not burn the child's mouth and increases the freshness of the mouth. One of the main reasons for the suitability of this mouthwash is that it is approved by dentists specializing in children's mouth and teeth due to the supply of fluoride needed by children. Due to the possibility of mouthwash being swallowed by children, teach them how to use it while using it.

Dental Floss

Gently cleaning the teeth with dental floss is an effective practice in oral and dental hygiene.

Using dental floss removes food residues, dental plaques, and cleaning the inaccessible parts of the teeth cannot be cleaned by brushing alone.

Vi-one dental floss contains mint extract, which creates a very good taste and sense of freshness, and also has good resistance. The waxy coating of Vi-one dental floss prevents damage to the gums, decay and loss of tooth enamel.

Breath freshener

Spray

Everyone experiences bad breath at some point in their lives. Many factors may cause bad breath, including problems with the mouth, teeth, etc. Bad breath may be temporary or chronic. According to reports, 50% of people experience bad breath in their lifetime. In addition to smelling bad, people may also feel a bad taste in their mouth. If the bad breath does not come from food residues, brushing your teeth will not remove the smell.

One of the ways to get rid of bad breath is to use a mouth freshener. Breath freshener spray is designed to remove bad breath. The breath freshener spray contains antimicrobial compounds and the effect of the mouth freshener spray will remain for several hours. This product is useful for temporarily eliminating bad breath. Breath freshener spray is available in different flavors and its small size makes it easy to carry this product.

It is easy to use and cools and smells good in a few seconds. Vi-one Breath freshener spray contains non-nutritive sweeteners and thus will not cause side effects.
